RE: Lead in Children's Product Purchased at Tuesday Morning (PHT 357)

Dear Ms. Mason:

We just received a report about a children's product purchased in a Tuesday Morning store in San Diego, California that contains illegal levels of lead. The lead levels reported exceed the limits in the federal Consumer Product Safety Improvement Act ("CPSIA"). Furthermore, selling the product without a proper warning likely violates California's Safe Drinking Water and Toxic Enforcement Act of 1986, commonly known as "Proposition 65." We are writing to ask that you stop selling the product immediately and take other corrective action as needed.

The children's product is a Barbie Bike Flair Accessory Kit that appears to be manufactured and/or distributed by Bell Sports, Inc. The SKU is 035011875736. It was purchased at a Tuesday Morning Store in San Diego on October 30, 2009. Our internal reference number is PHT 357. Please use it in communications with our office about this. We have enclosed photographs of the product.

The item was purchased by an investigator for the Center for Environmental Health, using a grant from a fund administered by the Public Health Institute. The fund was established through a Proposition 65 settlement between our office and several companies over lead in toys. (*People v. Mattel et al.*, Alameda County Super. Ct., Civ. No. RG 07-356892.) After screening the product for lead, the Center for Environmental Health sent a sample to a federally-approved laboratory for further testing. The test results, which are enclosed, indicate 6,196 parts per million ("ppm") lead in the bag's pink fabric material. This exceeds federal lead limits, which deem a children's product with more than 300 ppm lead in an accessible component a "banned hazardous substance." It also appears to violate Proposition 65, which requires a clear and reasonable warning prior to exposing persons to known carcinogens and reproductive toxins, including lead. (Cal. Health & Saf. Code, § 25249.6; Cal. Code Regs., tit. 27, § 27001.)

Lead is a toxic metal that damages the nervous system and other organs. Even at low levels of exposure, lead can impact brain development in children. Based on what appears to be violations of federal and state law, you should stop selling the product immediately. Additionally, please send us any test results you have and any representations from the manufacturer or supplier about the lead content in the product. Please contact us immediately so we can discuss what further actions your company intends to take.

Sincerely,

HARRISON M. POLLAK  
Deputy Attorney General
